

**Dear PIN team member! This is the pre questionnaire for the evaluation of the knowledge gained on the Boom training. It is completely anonymous and we ask you to answer it completely by yourself. If you are not sure, if the statement is TRUE or FALSE, please choose the answer I DON'T KNOW instead of guessing the right answer. In the end, please describe your expectations for the training.**

1. Always highlight the dangerous of the adulterants found.  
TRUE    FALSE    I DON'T KNOW
  
2. Black reaction to Marquis test means there is MDMA in the sample.  
TRUE    FALSE    I DON'T KNOW
  
3. Nausea and vomiting are side effects due to cocaine adulterated with levamisole.  
TRUE    FALSE    I DON'T KNOW
  
4. Some substances sold as LSD can last up to 36 h.  
TRUE    FALSE    I DON'T KNOW
  
5. A way to discriminate between LSD and some NBOME's is to taste the blotter, because LSD has no taste and the NBOME's have a bitter taste.  
TRUE    FALSE    I DON'T KNOW
  
6. Finger-dipping MDMA crystals is a good way to dose, because it is easier to control the dose and the resulting effects.  
TRUE    FALSE    I DON'T KNOW
  
7. Active doses of mescaline do not fit in a blotter or a microdot.  
TRUE    FALSE    I DON'T KNOW
  
8. If a user feels negative effects after consuming a non-tested drug, it is usually due to adulteration with toxic substances.  
TRUE    FALSE    I DON'T KNOW
  
9. Sometimes adulterant can be relatively harmless or even have desirable effects.  
TRUE    FALSE    I DON'T KNOW

10. New psychoactive drugs sold as ketamine tend to have more side effects and last longer.

TRUE FALSE I DON'T KNOW

11. If someone is bleeding from a wound you should immediately apply pressure.

TRUE FALSE I DON'T KNOW
